

Presentation

Nature is a beautiful creation. Nature provides us sunlight, water, air, animals, plants etc.

Technology is a creation of human. It depends on human skills and knowledge. ~~It~~ By using ~~tech~~ technology we can produce foods ~~or~~ and ~~be~~ needed things.

Connection of ~~tech~~ technology and nature. It has a great impact. ~~Using the the~~ ~~for things~~ ~~of nature, we~~. By using technology, we can get important things from nature. Pen and Pencils are made ~~for~~ of wood and ink. Cultivating foods using technology. ~~Shoes can be~~
Some shoes are made of ~~skin of cow, cow or cow skin~~.

We can get gold, diamonds
diamond from mine using
the technology.

Technology and nature are
being benefited by each other.

We can get electricity
from ~~water~~ the flow
of water. Nowadays ~~winds~~
~~the~~ the flow of
wind is being used to
produce electricity. Gas is
being used to drive a ~~car~~
vehicle and ~~cook~~ to cook also.

In future electric batteries
can be used to drive a
vehicle. Salt is being
~~produced~~ produced from sea
water. We can get salt

from the sea & well
water by purifying.

Solar panel is also running
by sunlight. We can get
lotter of jobs to ~~by~~ ~~from~~

~~Some~~
Some times technology ~~is~~ harms
us and our nature. The
wastages of factory can harm
our water environment.

Cutting trees much more, can
cause the global warming.

Radiation of telecommunication
can harm us.

~~to~~ To prevent pollution we have
to take steps like Indian

"Swachh Bharat Abhiyan"

swachh Bharat Abhiyan..

We can ~~se~~ separate the
recycling methods ~~into~~ into

two way. First of all, we
have to choose biodegradable things
and non-biodegradable things.

Bio-degradable things like ~~leftovers~~
Food leftovers. Non-biodegradable
things like broken glass, plastic
~~unusable~~ unusable plastic etc

Let without ~~tech~~ ~~techno~~
~~tech~~ technology and nature
we can not exist and live
comfortably. so ~~the~~ ~~so we~~
cannot if neglect the good side
